**Salt Lake City, Utah (February 4, 2016)** - Black Diamond Equipment, Ltd., in cooperation with the U.S. Consumer Product Safety Commission (CPSC), voluntarily issued a recall, subject to user inspection, of carabiners/quickdraws because of the possibility of defects in the gate that could cause the carabiner to fail or function incorrectly.

This recall concerns carabiners/quickdraws with manufacturing codes between 4350 and 6018. The complete list of carabiners, quickdraws, and harness, belay and rock protection packages concerned by the recall is above.

In some carabiners, the gate rivets (in solid gate carabiners) and wire ends (in wiregate carabiners) attaching the gate to the carabiner body may not be properly manufactured, potentially resulting in the gate becoming detached.

Additionally, in some screwgate locking carabiners, the locking sleeve may not have been correctly assembled, resulting in a locking carabiner that does not lock properly.

No accidents have been reported; however, in the interest of customer safety, Black Diamond has decided to voluntarily issue a recall, subject to user inspection.

If you own carabiners/quickdraws that fall within the scope of this recall, Black Diamond is requesting that you inspect them following the procedures outlined on the website below. If they fail inspection, stop use immediately and contact Black Diamond. We will replace your carabiners/ quickdraws free of charge.
